

Code.Scripts.Weapons.Bouncing
Bullet.OnDamageableHit

Code.Scripts.Weapons.Bouncing
Bullet.OnOtherHit

Code.Scripts.Weapons.Bouncing
Bullet.Destroy

```
graph LR; A[Code.Scripts.Weapons.Bouncing Bullet.OnDamageableHit] --> C[Code.Scripts.Weapons.Bouncing Bullet.Destroy]; B[Code.Scripts.Weapons.Bouncing Bullet.OnOtherHit] --> C;
```

The diagram illustrates a function call or dependency. On the left, two white rectangular boxes with black borders represent source functions: 'Code.Scripts.Weapons.Bouncing Bullet.OnDamageableHit' (top) and 'Code.Scripts.Weapons.Bouncing Bullet.OnOtherHit' (bottom). On the right, a gray rectangular box with a black border represents the target function: 'Code.Scripts.Weapons.Bouncing Bullet.Destroy'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions call or depend on the target function.
