

Code.Scripts.Enemies.Basic
Behaviour.ExecuteBehaivour

Code.Scripts.Enemies.Invis
Behaviour.ExecuteBehaivour

Code.Scripts.Enemies.Rocket
Behaviour.ExecuteBehaivour

Code.Scripts.Enemies.Behaviour.
GetRandomTarget

```
graph LR; A[Code.Scripts.Enemies.Basic Behaviour.ExecuteBehaivour] --> D[Code.Scripts.Enemies.Behaviour.GetRandomTarget]; B[Code.Scripts.Enemies.Invis Behaviour.ExecuteBehaivour] --> D; C[Code.Scripts.Enemies.Rocket Behaviour.ExecuteBehaivour] --> D;
```

The diagram illustrates a design pattern where three different enemy behavior scripts (Basic, Invis, and Rocket) all utilize a common method, GetRandomTarget, located within the Code.Scripts.Enemies.Behaviour namespace. Each script's ExecuteBehaivour method is shown with a blue arrow pointing to the GetRandomTarget method.
