Manager.RemoveCoins

```
graph LR; A[Code.Scripts.Managers.Shop Manager.BuyStat] --> C[Code.Scripts.Managers.Coin Manager.RemoveCoins]; B[Code.Scripts.Managers.Shop Manager.BuyWeapon] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Code.Scripts.Managers.Shop Manager.BuyStat' and the bottom box contains 'Code.Scripts.Managers.Shop Manager.BuyWeapon'. On the right, there is a single gray rectangular box with a black border containing the text 'Code.Scripts.Managers.Coin Manager.RemoveCoins'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both 'BuyStat' and 'BuyWeapon' methods from the Shop Manager depend on or call the 'RemoveCoins' method from the Coin Manager.
